AMERICAN VETERAN

Presented by

American Veteran Industries

Bill Rigby, COO

Pillars of Sustainability

Today's presentation highlights the opportunities provided through **ECO-6** offering disruptive technologies for the betterment of each nation working towards sustainability within the Lumi's vision. With limited presentation time, the detailed elements of each technology and/or opportunity will be presented at a later date.

Presentation Highlighted Solutions

Sustainable Energy

- ✓ 50% ± Avg. losses due to multiple conversions from generation to final use (load) with **CLEAN DC POWER** we can save 20% to 80% of current costs; this technology verified by NASA. Install without disrupting current grid.
- ✓ Use of low-grade heat energy generate electricity with an efficiency **of 30%** higher with **low cost**. Patented technology comply with UN sustainable model. Contributes to clean energy with carbon neutral.
- ✓ Worlds first solid state battery for green mobility
- ✓ Worlds first quantum motor with 100X charging ability
- ✓ Ultra-efficient green energy motors

Health & Wellness

- ✓ Nutrient packed delivery system through biodegradable straws
- ✓ Herbal and plant-based cosmetics
- ✓ FDA approved synthetic skin for grafting
- ✓ FDA approved low-cost collagen for surgeries
- ✓ CBD for better health
- ✓ Medical cannabis and psilocybin for chronic-anti depressant, major health issues and Agra opportunities
- ✓ Quantum Tele-Therapy light wave healing injuries through median such as a cell phone

Education & Training

- ✓ **MIT** course for sustainable technology to create jobs and innovations
- ✓ **HBCU** education, technologies and collaboration
- ✓ Post harvest technologies
- ✓ Disruptive secured cyber security diode technologies

Environmental Services

- ✓ Mine Cleanup Technologies
- ✓ Hemp blocks for sustainable buildings
- ✓ Emission reduction technologies
- ✓ Worlds leading fleet technology for clean and green environment

Water Resource Management and Agriculture

- ✓ Integrated ground water filtration system
- ✓ Desalination, water purification system by MIT
- ✓ Hydroponic technology
- ✓ Precision agriculture and crop control system

Media, Communications & Networking

- ✓ Disruptive Communications Portal
- ✓ TV Stations and Film Studios
- ✓ Emergency air medical care by drone system

Retrain Africa/Retrain ECO-6

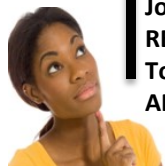

Advancing the diverse workforces of people through reskilling and upskilling, creating a solid foundation for their current and future success. Proprietary software is a market differentiator that provides career templates of skills and competencies to guide learners with customized training plans based on their current skills and the skills required for a new role.

The objective of the Community is:

- ✓ To establish, consolidate, and organize the six Lumi regions through integration amongst its members;
- ✓ Enabling the establishment of social-political-economic frameworks of cooperation between member regions, thereby promoting collective economic stability and raising the living standards of its people;
- ✓ Advancing African Diaspora political dialogue and social policies in areas of culture, education, energy, security, and ultimately serve as a formidable catalyst of integration between Africa and the Diaspora.

**BROUGHT TO YOU BY THE DEPT OF
SCIENCE AND TECHNOLOGIES ECO 6
AND THE OFFICE OF CROWN PRIME
MINISTER OF THE AMERICAS H.I.M.**
