HURRICANE ELSA APPROACHING THE CARIBBEAN

(Source: NBC 6)

MAXIMUM ALERT

Elsa gained strength with its latest advisory Friday, becoming a Category 1 hurricane as it moves closer to nations in the Caribbean and keeps South Florida in the cone of concern.

The latest advisory from the National Hurricane Center has winds at 75 miles per hour while sitting just 75 miles east of St. Vincent. The storm is moving to the west-northwest at 28 miles per hour.

A hurricane warning has been issued for Barbados, St. Lucia, St. Vincent and the Grenadines.

A hurricane watch remains in effect for the southern portion of Haiti from Port Au Prince, Jamaica and Dominican Republic.
